Food

### Bandeng Presto

This dish is called Bandeng presto. It is a fish dish. And it's a dish where you pressure cook this fish called Bandeng. The Bandeng would be seasoned with garlic, tumeric, and salt. It will then be pressure cooked on a banana leaf. The pressure cooker makes the bones incredibly soft.

Contains a picture of Bandeng Presto and a description of the dish

### MPU Tantular Museum

The MPU Tantular Museum is a national museum located in Buduran, Sidoarjo, East Java. Originally, it was named Stedelijk Historisch Museum Soerabaia, built by Godfried von Faber in the year 1933 and inaugurated in 25 July 1937. Today, the museum is handled by the Unit Pelaksana Teknis pada Departemen Kebudayaan dan Pariwisata.

As of 2021, the Mpu Tantular Museum collection reached 15,600 collections, which are classified into ten types of collections, namely: geological, biological, ethnographic, historical, numismatic, heraldic, fine arts, technological, ceramic and philological. Due to limited exhibition space, the museum only exhibits a small part of the entire collection. The remaining collections that are not exhibited are stored in the collection storage room. The collections exhibited in the permanent exhibition room consist of collections from prehistoric, Hindu-Buddhist, Islamic kingdoms, colonial and modern times, including the IPTEK (science and technology) collection.

Contains a picture of MPU Tantular Museum and a description of what it is

- Pseudo Code

The only real code I put in this was hiding and showing the game on the profile page. Here is a pseudo code of it:

```
function hideGame():  
  x = get element by id "le-game"  
  
  if x's display style is "none"  
    set x's display style to "block"  
  else:  
    set x's display style to "none"
```

This function gets called by clicking the “Show/Hide Game” Button on the profile page. And the game is contained inside a div with the ID “le-game” which is the target in the code above
